

# Portfolio

By Massimiliano Leoni

# Me in a nutshell

- MSc in Mathematical Engineering, Politecnico di Milano (2016)
- Master's thesis at Rolls-Royce (2015)
- Double PhD in Computer Science (KTH) and Mathematics (UPV/EHU) (2020)
- Research Scientist at the Austrian Academy of Sciences
- Software engineer at Proxima Fusion

# Three selected projects

- Modelling and simulation of Extra-Corporeal Membrane Oxygenation
- Cardiac Radiofrequency Ablation and function interpolation
- Thermal analysis of a first wall

# Modelling and Simulation of Extracorporeal Membrane Oxygenation (ECMO)

# Paper

[Scientific Reports \(Nature Portfolio\), 2022](#)

Awarded *Best Paper of the Year* by the Austrian Academy of Sciences.

# Overview

Extracorporeal Membrane Oxygenation (ECMO) is an ICU procedure that oxygenates blood externally when pulmonary function is severely impaired. Clinicians had observed a persistent drop in oxygen transfer efficiency during ECMO and suspected **recirculation**—the unintended return of oxygenated blood to the venous system—as the root cause.

I developed a computational model of the ECMO process to test this hypothesis and quantify the contribution of recirculation under realistic physiological and clinical conditions.

# Approach

- Developed a Finite Element model of cardiovascular flow dynamics and oxygen transport
- Incorporated cannulation geometry, machine characteristics, and patient physiology
- Ran extensive simulations of clinically relevant configurations
- Compared numerical outcomes to ICU observations to improve clinical understanding

# Key Findings

- **Recirculation is a necessary evil** and not even optimal cannula placement can solve it
- **Intrinsic limitations of ECMO design** impose upper bounds on achievable oxygenation

# Impact

- Provided clinicians with an explanation for observed oxygenation limits
- Informed interpretation of ECMO performance metrics in ICU practice
- Published in *Scientific Reports* and received **Best Paper of the Year** from the Austrian Academy of Sciences
